CAMERON INTERNATIONAL HIGH SCHOOL CURRICULUM

Cameron International High School provides an education that will challenge, inspire, develop and motivate students. We are a unique school underpinned by core values that supports the development of lifelong learning skills in every student. We create an environment that inspires all our students and gives them the confidence and enthusiasm to achieve and succeed.

Our broad and balanced curriculum includes a full programme of subjects, such as Science, Languages, Music, Humanities, Sports, Art & Design and of course English and Maths.

Our commitment to excellence in teaching encourages our students to have high expectations of themselves, striving to reach their full potential.

We expect high standards of conduct, appearance and achievement, our wide range of subject options help to keep our students engaged. We encourage Students to take responsibility for their progress and behaviour.

Cameron International High School located at the prestigious San Roque Club in the province of Cadiz provides high-quality education for students aged 12 to 18 years of age. The school boasts extended opening hours from 07:30 until 19:00. There is an area provided for students to use before and after school times, where they can continue to study and revise.

Each class will be kept to a maximum of 16 students to ensure that every student gets the attention and help they need to thrive in their education. Our teachers are fully trained and have a wealth of experience from across the globe. Each lesson will be taught in English except for the language classes.

CAMERON INTERNATIONAL PRIMARY SCHOOL CURRICULUM

Cameron International School will follow the International Primary Curriculum (IPC). The IPC is a comprehensive, thematic, creative curriculum for 3-12-year olds, with a clear process of learning and with specific learning goals for every subject, for international mindedness and personal learning. The IPC has been designed to ensure rigorous learning but also to help teachers make all learning exciting, active and meaningful for children. Learning with the IPC takes a global approach; helping children to connect their learning to where they are living now as well as looking at the learning from the perspective of other people in other countries. The IPC is used by schools in more than 90 countries around the world. That is why the IPC has over 130 different thematic units of learning; which tap into children’s interests, are internally relevant, and help them to learn more about and engage positively with the world around them; themes include Who Am I? The Magic Toymaker, Active Planet, Young Entrepreneurs, Mission to Mars, and What Price Progress.

In addition to this, the IPC has created a set of Brainwave units which help teachers and children learn about the philosophy, pedagogy and process of the IPC, helping to introduce them to the IPC Personal Goals, international mindedness, self-reflection, metacognition and much more. Teachers love to kick off the school year with these units to ensure that children have a growth mindset for learning.

Organising units in around a theme helps children to see how subjects are both ‘independent’ and ‘interdependent’ enabling them to see ‘the big picture’ of their learning, make connections through and across different subjects, and talk about a theme from multiple perspectives. Learning tasks for each subject have been written offering a wealth of ideas for research and recording activities, which provide children with the opportunity to work collaboratively, practically, in and out of the classroom, using role-play and learning from each other.

Each IPC unit incorporates a range of the different subjects, along with suggested links to Language Arts and Mathematics. In addition to our larger thematic units of work, we have also created some subject-focused units, which still follow the IPC process of learning, and include the IPC Personal Goals and international tasks.
